I wasted a \$1. Highly enjoyable, pixel-styled fun with great soundtrack and a deep story. Recommended.. Strike sense and game rhythm okay, the second off the scene is pretty good, and monsters hide and seek very interesting, but a bit challenging, and suddenly died, need to play, familiar map

. There's finally more than one male voice actor for all the enemies. After using my detective skills to actually find the dlc in the menu this is what I found;

First of all going off in the snowy mountains to do ninja training is the best back story ever, hell it worked for sub zero.

Using the ninja skills such as the shurikens, caltrops, smoke etc was pretty cool, but there was no content. And on the predator map the ninjas were using machine guns which isn't very ninjery.

So even if you love ninjas like I do (and by love I mean you think ninjas are really cool, not as in you want to marry one although that would be cool in its own way).

I can not recommend this game.. i cant play the game. i spent many many many hours playing netstorm when my dad randomly picked it up for me. and from what i can tell the art seems very similar and nice. the controls seem similar aswell if unfinished. sadly couldn't test out gameplay much at all. as there is no singleplayer yet and noone was online. tentatively i'd say its worth a purchase from what i did manage to see even if the price is a bit steep.. Filtthy good... 10/10 would do again!!... Gret point and click hidden object game, it has lots of great puzzles which actually make you think. The main game was fun but when I got to the bonus chapters I stopped getting achievements and the task and hints got stuck on the prison cell which is the first room in the bonus content...I was able to complete it but it didnt record the achievements in steam and the bonus minigames show as locked still.

As of right now the game is not playable. The deck you build as you get better by training does not work. You will spend hours training and fighting matches, only to realize the 40 cards you have saved in your fight deck is not the same cards your being dealt in fights. As you rank up and fights get harder, you will notice the more as you get to know your cards and see that you put very good cards in you deck than what you started with, but in fights you are still being dealt trash cards that you took out along time ago. So you loose the fight. Your playing a game using random cards each fight though it's supposed to be using only the 40 cards you built your deck with. I will change my review when they fix the game stopping bug, because this could be a good game. but as of right now do not buy.. I am speechless. Even 30 seconds of a Valve employee looking at this and we could have avoided having it on the storefront. This is ugly and terrible.

https://youtu.be/YMBFrr_7v8Q. Nice dlc that's worth the price to me. The more options the better.. Leatherface is one guest character I would never have expected. That being said I think he has decent moves, and an overall unique fighting style. Overall he seems like a decent addition, at least mechanically.. I'm already liking the DLC and I just started playing the main game, definitely appreciate that the DLC starts showing its value super early (2nd stage). Recommended buy if you liked the main game.. The executable still has SecuROM in it even though it's been broken in Windows 10 since years ago.. Amazing game, but we need multiplayer mode
