About This Game

Description

High Noon Revolver is a 2D Action Shooter; blast your way across 3 layers of platforming, collecting gold and obtaining upgrades helping you go from puny to powerhouse. Play as a cast of colorful characters, each with unique weapons and abilities (like Chickens with Shotguns and Robots with Swords!). Chase down and collect bounties on Wanted outlaws everywhere from Sunken Ships to Haunted Mansions!

Features

- Play as a slew of colorful characters with unique weapons and abilities
- Collect hefty bounties on Wanted outlaws
- Spend gold on character and weapon upgrades
- Chase down criminals across diverse landscapes
- Race against your best time to achieve high scores
- Unlock Steam Cards and Achievements
- Play with friends in Local Co-op

Title: High Noon Revolver
Genre: Action, Indie
Developer:
Mike Studios
Publisher:
Spaceboy Games
Release Date: 25 Jan, 2017

a09c17d780

Minimum:

OS: Windows 7 or Later

Processor: 2 GHz

Memory: 1 GB RAM

Graphics: 512 MB VRAM

DirectX: Version 9.0c

Storage: 20 MB available space

Sound Card: Yes

In Tin Star, you play a US Marshal, presumably occupied with Honor, Law, and Order (there are stats for each category). My primary complaint about the game is that it offers too much individual freedom, to the point of departing from its premise. What kind of Marshal blows up dams, robs wagons and shoots people under no provocation? While many scenarios have diplomatic solutions, violence isn't only a last resort. In other words, I think the story might have been more convincing if the player had other careers to choose from, as opposed to being made a Marshal by default.

That being said, any fan of RPGs should welcome Tin Star. It's constructed like a massive Western D&D campaign and is both one of the longest and most interactive titles by Choice of Games. The challenges it offers are numerous and inventive, avoiding the grindy repetition typical of the RPG genre.

. Fun little game, pretty solid for some levels, however crashes every time after the tic-tac-toe part, that's why I can't recommend. :/. Very impressive for early access! Solid and smooth controls, vibrant graphics, awesome sound and voiceover. And a huge thumb up to the killer soundtrack. Cool interactive game! My little sisters love playing this game so much.. Way too oldschool. Feels boring and lacks action.. This is ridiculous.

Let's begin with starting the game:

You launch it, and instead of showing up, the game will take you to the Steam Shop site of RIP - Trilogy.

A short research told me, that I have to install the demo of RIP.

Luckily, it's enough to click on the download button and then cancel it immediately.

Once the game is started, I had a black screen and some noises, then a screen showed up where I had to choose between three 4:3 resolutions.

Once done, the game starts: Another black screen with weird noises about a minute long this time.

After that I was finally in control. After clicking the first clickable thing: Black screen, weird noises.

Okay then, another quick research.

The black screens are supposed to show videos. Since they seem to only play in windowed mode, you have to activate it manually via alt + enter, since there is no option for it.

That fixes another bug too: The subtitles only show in windowed mode.

So I finally began to play, noticing that the window goes to fullscreen again very often, so I missed still a few cutscenes without anything I could do about it.

After few minutes of this frustrating gameplay: Random death.

Or at least it seemed random.

After I died three times in about 20 minutes, without being able to tell why, everytime starting from the beginning of the act, I managed to progress a bit more through this black and white nightmare.

Then it happend again. Automatic switch to fullscreen, so I switched back to windowed mode. Only this time, my surroundings disappeard, leaving me with only my character visible.

A little bit confused, I tried to click on the ground around him: Death animation.

At this point, I just couldn't bring me to play anymore and uninstalled it.

0 out of 10 points for this pile of garbage.. Vodka is better than drugs. Nice and funny.

Great game, one of those where you go in as best friends, but come out as mortal enemies.

5/5. Good quality and open world, but srsly, whoever made those missions should be fired... It is a classic strategy in 2 parts. Phase 1 almost equal to Phase 2, the only thing Phase 2 have done is new missions and Italy + Yugoslavia. Story is very well written, panzers themselves are good realized. Infantry is a bit sucky (it always so in classics).

Despite being released in 2004, the game is good alternative to that Company of Heroes 2 shame. Campaign is more interesting, game is harder (if you choose hard mode your losses will be unrestorable) and it doesnt want you to buy stuff like generals etc. PS Russian voices are not very good. Pronunciacion is fine, but phrases sometimes ugly.. Absolutely Awesome!. Its a fun idea, but the camera makes me motion sick and the controls are a bit counter-intuitive. the game has loads of potential though if controls, camera, and popups get a touchup.. Teamed up 3 against whoever joined after 10 minutes, made best friends for life <3 10/10 game. This is my first review of a game even though I have 76 games in my library, most of them ARPGs. One of the reasons I'm reviewing it is that unlike a lot of games in my library, I bothered to play it through to the end. For someone like me who bores easily, that's saying something good.

On some levels In Exilium doesn't begin to compete with ARPGs like Diablo 2, Titan Quest, etc. But that's okay with me because it doesn't really try to. It takes a different approach. It focuses more on exploration and puzzle solving than smooth, fast paced combat and tons of awesome loot. And even though I love those latter things, I found In Exilium to be a refreshing change.

The puzzles were just the right difficulty for me to not get too hung up on but still have to think about a little. You have just enough freedom in regards to what areas to take on first to make your first playthrough more interesting. The combat, while perhaps clunky compared to bigger budget titles, was still adequate. You have a variety of skills to choose from whatever type of character you choose to play. The atmosphere is cool enough. There's some replay value if you want to build a character for each of the 3 main playstyles. The drops, while plentiful enough at least in the latest version, weren't all that interesting to me and are an area that could maybe be improved on a bit.

All in all I just found this game enjoyable. It was refreshing, fun, and relaxing to play through. And if you're looking for a game to have fun and relax with then I recommend you give it a try!. low res pictures that will straing your eyes, staid design. Also sometimes refuses to quit out. Not worth your time.
