If you are really into puzzles and you need to solve every single one then this game is for you. But. You will probably blast through these levels (2-4 h my estimate), at a cost of \$6.59, which is too expensive. At the moment there are about 25 community puzzles available to be fair. The music quickly gets annoying. There is no story at all, why are you in the lab solving puzzles, or who is your character. Animations and art-style feel very sterile. (I get it, it's a LAB, but does it have to look lifeless?) You command some little Heisenberg/ Walter White and try to evade the Monks and Murder Facest(rly?) . Humor might be found in the poor animation quality, when Heisenberg is touched by an enemy he falls over like a plank. Always play in top down view, because you might overlook a button behind a wall. This would work better without the moveable 3D camera perspective, meaning purely 2D, But you can play it in VR? What for??? All the physics is in 2 dimensions without any diagonal movement on a rather small grid. A 3D puzzle game utilizing VR could be interesting even if there were only 5 levels and a game focusing on 2D puzzles could be longer with more/better animations. It looks more like some unfinished student project or tech demo. I don't know why this exists. This will be my first returned game on Steam.. Great puzzle game with good mechanics and UI. Best one i have come across of its type up to now. Easy to use editor to make own levels for others to play and share. I do not use VR and it plays great without..

Update Release : Changes in this update: - Official support for Unity's config dialog. You can use this to remap controls, change resolution, and change render quality settings. A new steam launch action has been added that will automatically pop this up before running the game. - Added support for gamepad controllers. At the moment, they can only be used to play puzzles and not do any menuing. You will still need a mouse to navigate menus.. Update Released : A major art update has been released. Changes include: - Refined all colors used in the game.. Update Released : An update has been published. Changes include: - Added lab environment surrounding puzzle. - Replaced player model art. - New music has been added and old music has been replaced. - Fixed VR controllers disappearing after pressing the menu button. - Guardians no longer try to fire through walls.. Update Released : Minor update - features include: - Integrating latest version of SteamVR. You can now remap VR controls within the new SteamVR controller UI. - Puzzles can now be placed on wall during play in VR. Before, the puzzle would only be on the wall while editing. Default control to switch anchors is up / down on the left controller.. Update Released : A new update has been released. Changes included with this patch: - Tweaked / fixed some "story" puzzles - Dropped items now align to whole grid cells instead of half grid cells - Changed voting conditions when playing a user level. You must now either die, complete, or have played the level for 20 seconds after moving before you can vote on a level.. Update Released : A new update has been posted that includes: - Player movement better aligns to the grid. The player will continue to walk to nearest whole grid

cell after input is released. This should make it easier to make precise movement to avoid things such as lasers. The player speed has been reduced by a small amount to help avoid overstepping grid cells by accident. Feedback welcome! - Attempting to fix crates not moving to their final destinations - Users can cast votes on all online puzzles, not just after completion. - Users can change votes on previously played levels - The puzzle browser now shows the number of level completions in addition to the number of plays. This can be used as a way of determining difficulty until a better solution is in place.. Update Released : An update has been released with the following changes: - Added template puzzles to the editor. When you create a new puzzle, one of several templates will be chosen. A 'New' button has been added to erase the template and start fresh. - Added editor tips that display upon placing certain types of entities. - Fixed unintended path in one of the main puzzles. - Fixed minor bugs.. Puzzle Lab 1.0 Release : Today, we are excited to announce the official release of Puzzle Lab! This has been a great journey and we would like to thank everyone who has given feedback and helped shape the game. We have big plans for the future, including features to help players who get stuck and new content. More information will be released in the upcoming months.. Puzzle Lab now available! : Puzzle Lab is now available for download on steam. If you have a VR headset, you can enjoy the game in glorious virtual reality. No VR headset? No problem! Experience all that Puzzle Lab has to offer as a normal desktop game.. Update Released : The latest update brings with it the following changes: - Added entity descriptions in the editor. Mouse hover over entity icons in desktop to have a popup appear. A side panel will display in VR when an entity is selected.
